

GOOD MORNING EVERYONE

We will start @ 10:10 am

Q- How to take user input ?

Q- Comment

Use input in Java

int a

↳ Scanner
↳ use input in Java.

↳ Scanner sc = new Scanner(System.in); help us to take user input

Scanner
↓
Scanner class

sc
↓
variable name

new Scanner (System.in);
↓
format

Integer input

int a = sc.nextInt();

String

String input

↳ String str = scn.next(); ↵ My

↳ String str = scn.nextLine(); ↵

My name is Abc

My name is Abc ↵

Note:-
scn.next() → stop taking I/P when it get whitespace
scn.nextLine() → store complete i/p present in a line.

Character input

(single character)

before Java 8
 ← scan next character

char ch = scn.next().charAt(0);

String

take character of the
zeroth position

char ch = src.nextLine().charAt(0),

↓
string

Character of zeroth position.

Boot Camp

Double

```
double d = scn.nextDouble();
```

Boolean → true / false

```
boolean b = scn.nextBoolean();
```

↳ Q-1) WAP to convert C to F → 4 mins
↓
use input

$$F = (C \times 9/5) + 32$$

11:25 am.

↳ Q-2 WAP to calculate average of 5 subjects → 6 mins
 $m_1, m_2, m_3, m_4, m_5 \rightarrow$ use input

↳ Return the average marks $\rightarrow (m_1 + m_2 + m_3 + m_4 + m_5) / 5;$

↳ Q-3 WAP to calculate S.I. → 5 mins.
↳ $P, R, T \rightarrow$ use input
↳ Return SI $\rightarrow (P \times R \times T) / 100;$
